PROJECTS

- StoreNex (E-Commerce Website)
- News Aggregator Using Python
- Invoice Data Extrctor in ML
- Task management App in Django

EXPERIENCE

Jr. Python Developer

Redspark Technologies

June 2024 to Present

- Developed a Django-based task management application with a hierarchical structure, enabling real-time task supervision for CEOs, project managers, and team leaders. Integrated task delegation, project monitoring, and real-time email notifications for seamless communication across the organization. Contributed to the Goalactico platform by developing REST APIs for iOS and Android, creating an admin panel, and building a multi-language website for regular users. Implemented secure authentication via Apple OAuth and optimized API endpoints to enhance platform efficiency and user interactions.

Laravel Developer

Redspark Technologies

December 2023 to May 2024 (6 Months)

- During my industrial internship, Led development of StoreNex, incorporating dynamic product catalog, user authentication, Razorpay payment integration, and an admin dashboard. Ensured responsive design and deployed using InfinityFree web hosting.

Back-end Developer

Hybrid Workforces

June 2023 to July 2023 (1 month)

During my industrial internship, I contributed to an innovative text extraction project. The work involved developing a robust system using Tesseract OCR and Node.js for extracting textual content

Back-end Developer

Symbiotic Now

December 2022 to January 2023(1 month)

Developed Eventmanagement System For collage Fest (Ananta'23) in Php

Back-end Developer

Svaapta It-Ally Solutions Pvt Ltd

July 2022 to August 2022 (1 month)

Task Based work On Web Development in Live Project Using HTML, CSS, PHP, JAVA Script, JQuery, GitLab and Update all Using GitLab
